STATINTL

Dear Jack,

STATINTL

After reviewing the switch gang assembly drawing [Redacted] I find several changes necessary. I would like to suggest the following ordering information for switch placement as indicated on their sketch:

Switches 1 thru 16	Type A	1223	L41W1G1
Switch 17		2714	L702R2
Switch 18	Type B	1023 N	L78W1B1
Switch 19	Type B	1023 N	L78 W1G1
Switch 20	Type B	1023 N	L78 W1BE
Switch 21	Type B	1023 N	L78 W1Y1
Switch 22	Type B	1023 N	L78 W1A1

No legend is to be placed on lenses 1 through 16 and lenses 18 through 22. Switch lens #17 is to be hot stamped in black on 2 lines with 0.070" "News Gothic". The legend is to be TRANSMISSION NOT COMPLETE.

The configuration as presented and dimensions of the subpanel and switches is acceptable.

If any further questions arise please feel free to contact me.
